Social Responsibility Report

We are happy and proud to share our 2019-2020 Social Responsibility Report, presenting the main work BMA has done over the last two years to generate social impact by promoting diversity and inclusion, education, culture and solidarity.

The report brings together material that reflects **BMA's DNA**, channeled through our vectors for change – BMA Diversity, BMA Women, BMA Inspiration, and BMA Education. In challenging times, we strengthened our practices and learned much about the role we can play in transforming society, both within and outside the firm's walls.

Our intention is to contribute actively to reducing inequalities, and to give back to society the benefit of what we have built over our 25 years of existence.
