Recognition

We are proud to announce that BMA has been recognized by **Chambers Brazil: Industries & Sectors 2022**, one of Chamber and Partners' guides to the most respected lawyers and law firms in the country.

We have been named in four areas: **Data Protection, Environment, Media & Entertainment, and Technology**, with seven practitioners highlighted by the publication: Ana Cândida de Mello Carvalho (Infrastructure and Regulatory and Governmental Affairs), Beatriz Paulo de Frontin (Environment and Climate Change), Felipe Palhares (Data Privacy and Cybersecurity), Márcio Pereira (Environment and Climate Change), Marina Maciel (Environment and Climate Change), Pedro Barroso (Intellectual Property) and Vitor Butruce (Research).

With Marina's recognition for the first time in the guide, we highlight our Environmental and Climate Change practice area, which this year had all its leaders ranked.

This is the second release of the guide, which is divided into different parts: Chambers Brazil: Contentious, Chambers Brazil: Industries & Sectors (released today), Chambers Brazil: Regions, and Chambers Brazil: Transactional.

The presence of our practitioners in guides such as Chambers Brazil is a reflection of their dedication, commitment and consistently excellent work. Congratulations to all on this newest achievement!
